WINTER AT THE BEACH

THE NEVER-ENDING BEACH

COTTON CANDY SNOW

EXPLODED AXO-DIAGRAM

Project Overview

This design competition is the Winter Stations, held in Toronto, Ontario. Participants must create a momentary winter art piece strategically placed across Woodbine beaches.

This station was created with the intent to inspire colour and movement. The material of the coloured panels are Green Cast Recycled Acrylic. The two main colours used in this installation is blue and red. These two primary colours can create other colours as well once mixed together or with other colours added to them as well. Concerning this installation, depending on the weather, the sun and the angle will all determine the colours you will be able to see when exploring this station. This installation is just as beautiful during the summer as it is in the winter.
